

The Action Quarterly

We are pleased to announce Daryl Barber as the new President of Action Fire Pros. Many of you are familiar with Daryl from his previous position as the VP of Operations for Action. He has been with us since July of 2003 but has over 28 years of experience in the fire protection industry as he began as an apprentice in July of 1989. Action is excited about the experience and enthusiasm Daryl brings to this position.

Don't worry about things slacking in the operations department. Joe Roy has been promoted to take over Daryl's duties, and while Joe has only been with Action just short of a year, he has made a huge impact on this department. He has over 34 years of experience in the fire protection industry and we look forward to all of the knowledge and experience he brings to the table to assist our customers and lead our service technicians.

As always, our customers are a major consideration in our decision-making process. We believe these team additions will only enhance our customer service and bring heightened levels of expertise to our company. Both Daryl and Joe have open door policies for employees, vendors and most importantly for you as our valued customer. If you ever have a question or concern about Action Fire Pros, please feel free to contact them directly.

Daryl Barber – President: dbarber@actionfirepros.com

Joe Roy – Sprinkler Operations Manager: jroy@actionfirepros.com

We look forward to continuing to provide our customers with "Responsive, dependable commercial fire protection services done right."

Firewise Spring Cleaning

Ah, springtime! A fresh new start and a great time for some spring cleaning around your home and office. It is important to think of how you can make your surroundings “Firewise” to protect lives and property. This is a great time to assess old clutter that you may have laying around. Items such as leftover fire wood, tires, old furniture, and paper items can often accumulate into “trash piles” over the year and this creates a fire hazard, especially if close to your home in drought/wildfire season in Texas. Do some spring cleaning to clear out this clutter and if you need to keep these items be sure to store them in your garage, enclosed shed, or warehouse for safe keeping rather than near your home or under a deck.

Be sure to also clear your roof and gutters of leaves and debris, trim tree branches that overhang your house, and maintain a green lawn for 30’ around your home to keep potential wildfires from spreading to your property. Firewise yards will have green grass, rocks, or sometimes just soil to create an empty area of land where the heated intensity of a wildfire cannot reach. You should avoid leaving deadwood or dense flammable vegetation around your home or office, and as a fail safe always have a couple of fire extinguishers (charged and ready) nearby in case of an emergency. Please give us a call at 1-800-550-2287 if you need new or replacement fire extinguishers and we’ll be happy to assist you as you make your property Firewise this year!

Action in the Community

Action donated children's bicycles for a fundraiser to get kids in the community involved with our local police department
